PROFESSIONAL SUMMARY

Full Stack Developer experienced in building scalable applications with Python, React.js, Node.js, and MongoDB. Proven track record in automating workflows, such as reducing manual screening time by 50% through AI-integrated recruitment systems. Possesses a strong understanding of Agentic AI principles, focusing on the core logic and functional architectures of autonomous agents.

TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript, Python, SQL

Frameworks & Libraries: React.js, Flask, Django

Database: MySQL, MongoDB

Foundational Knowledge: Generative AI, Agentic AI

EXPERIENCE

AI Engineer Intern | Univision Technology Consulting Pvt. Ltd. (ONSITE) Dec 2025 - Mar 2026

- Engineered a Smart Recruitment Management System with dedicated dashboards for candidate and HR users, reduced manual resume screening time by 40%, enabling faster identification of top talent.
- Integrated an AI-powered ATS chatbot to automate resume screening, generate ATS scores, rank top candidates, and accelerate data-driven hiring decisions.

PROJECTS

Smart Recruitment Management System | React.js | Python | Flask | MongoDB

- Reduced manual resume screening time by 40-50% by implementing an ATS chatbot that automated resume scoring, candidate ranking, and summary generation.
- Improved hiring efficiency and decision-making speed by streamlining end-to-end recruitment workflows, enabling HR to identify top candidates within minutes.

ShopSage | React.js | Python | Flask | MongoDB

- Streamlined multi-role e-commerce operations by implementing Role-Based Access Control across admin, seller, and customer modules.
- Implemented a content-based recommendation engine using TF-IDF and cosine similarity, increasing user interaction with recommended products by 15%.

Weather Website Using Django | HTML | CSS | Python | Django

- Delivered real-time weather insights (temperature, humidity, precipitation) for any city, improving information accessibility and decision-making for users.
- Enhanced user experience with dynamic city-based visuals and instant search functionality. Increased user engagement and usability by 30% through real-time data rendering.

EDUCATION

Master of Computer Applications (MCA)

Dwaraka Doss Goverdhan Doss Vaishnav College

Aug 2024 - Apr 2026

Chennai, India

B.sc. Computer Science

Dwaraka Doss Goverdhan Doss Vaishnav College

Jul 2021 - May 2024

Chennai, India

CERTIFICATIONS

React.js - Cambtech

Career Essentials in Generative AI - Microsoft

Understanding Agentic AI - Agent Academy

Cloud Computing and Distributed Systems - NPTEL

UI/UX Design - TVS
