OBJECTIVE

Full Stack Developer specializing in building scalable and high-performance web applications. Strong experience in Java, Spring Boot, and the MERN stack (MongoDB, Express.js, React.js, Node.js). Focused on developing robust backend systems and responsive frontend interfaces using modern development practices. Currently pursuing MCA with a goal to create impactful, future-ready products that solve real-world problems and deliver value at scale.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, HTML, CSS
Frameworks and Libraries: React.js, Node.js, Express.js, Spring Boot
Web Technologies: REST APIs, JSON, Responsive Web Design
Databases: MongoDB, MySQL, SQL
Tools and Technologies: Git, GitHub, AWS (Basics)

INTERNSHIP EXPERIENCE

Technorucs Private Limited

Dec 2025 – Mar 2026

Full Stack Developer Intern

Chennai, India

- Built and deployed a full-stack AI-powered contract risk analysis platform using the MERN stack (MongoDB, Express.js, React.js, Node.js) with end-to-end ownership from UI to database
- Developed and integrated Python FastAPI microservices to handle AI/NLP contract processing pipelines, connecting seamlessly with the Node.js backend via REST
- Designed and optimized MongoDB schemas for storing contracts, extracted clauses, and risk analysis results, improving query performance and response time
- Built responsive React.js frontend interfaces for contract upload, clause visualization, and AI-generated risk analysis reports

PROJECTS

AI Powered Contract Risk Analysis Platform | React.js, Node.js, Express.js, MongoDB, AI, NLP

- Developed an AI-powered web application to analyze legal contracts and automatically identify potential risks and non-compliant clauses
- Built backend services using Node.js to process contract data and manage document workflows
- Designed a responsive frontend using React.js for contract upload, clause visualization, and risk analysis reports
- Generated context-aware AI responses using Large Language Models (LLMs) to improve contract analysis accuracy
- Designed a scalable MongoDB database structure to store contracts, extracted clauses, and risk analysis results

EduTruck — Learning Management System (LMS) | Java, Spring Boot, React.js, MySQL

- Developed a web-based LMS to help students access courses, study materials, and track their learning progress online
- Built an interactive frontend using React.js to provide a responsive and user-friendly learning interface
- Enabled instructors to create courses, upload learning materials, and monitor student participation
- Improved digital learning accessibility by providing a centralized platform for online education management

Smart Healthcare Management System | Node.js, Express.js, React.js, MongoDB

- Developed a full-stack healthcare management web application to digitize patient records, appointments, and medical history
- Built RESTful backend APIs using Node.js and Express.js to manage patient data, doctor profiles, and appointment scheduling
- Designed a responsive frontend using React.js to provide an intuitive dashboard for doctors and administrators
- Implemented MongoDB database to securely store patient records, medical reports, and appointment details

EDUCATION

Master of Computer Applications (MCA)

2024 – 2026

Dwaraka Doss Goverdhan Doss Vaishnav College | CGPA: 7.9

Chennai, India

Bachelor of Science in Physics with Computer Application

2021 – 2024

Dwaraka Doss Goverdhan Doss Vaishnav College | CGPA: 7.5

Chennai, India

CERTIFICATIONS

- Full Stack Development Certification** (Dec 2024 – Jan 2025)
Completed certification covering HTML, CSS, JavaScript, React.js, Node.js, and Express.js. Built full-stack web applications with REST APIs and database integration. Practiced Git and GitHub for version control and collaboration.
- NPTEL Certification** – Cloud Computing & Distributed Systems (Jan – Mar 2025)
Learned cloud architecture, virtualization, and distributed systems concepts. Studied scalability, fault tolerance, and cloud service models (IaaS, PaaS, SaaS).
